

USER MANUAL

Activation code : "1234" Name BT: SS

Connect the shower to the electrical current in your home.

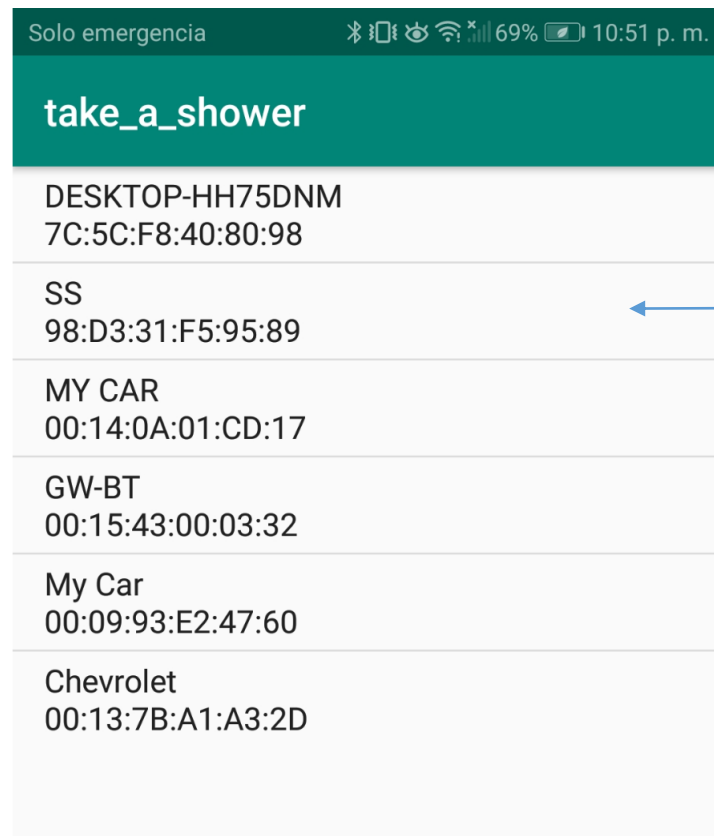

Now with your cell phone link to the bluetooth of the shower (the name appears at the beginning of this sheet). Use the activation code at the beginning of this sheet.

Once you have entered the application a screen will appear like the following image

Press the button
ENTRAR

Now the following screen will appear:

Connect to the
bluetooth of
the shower.

Now the following screen will appear:

In the upper right corner there is a button with the Bluetooth icon, if we press it it indicates if we are connected to the shower or not.

Then there are two sliding bars to open and close the faucets.

Below these sliding bars there is a message that says "VOLUME" and this indicates the liters they are consuming.

When it reaches 3 liters, the shower will turn off the faucets automatically so that this water saving is made.

If you finish bathing before the 3 liters are used up then press the END button on the bottom and the faucets will close.

(3 liters because that's how I programmed it, but can be any value)
